

Faculty of Environment

Alternative format for PhD thesis

Set out below are a couple of thesis examples that are close to what our alternative thesis format would imply.

First social science thesis example can be found from here <http://www.tdx.cat/handle/10803/285043> (Download link at the bottom of the page): I was external examiner of this thesis which was submitted at the Institute for Environmental Science and Technology at the University of Barcelona.

Another more natural science leaning example can be found from here <http://www.tdx.cat/handle/10803/290841>

These examples are not provided as detailed guidance on style or as quality benchmarks – they merely provide concrete examples of how theses can be structured around publications.
